

Are you a PhD student conducting interdisciplinary research? Would you like to undertake a year's internship in one of the best universities in northern Poland?

This proposal is for you

The Mayor of Gdańsk in cooperation with the Fahrenheit Universities have created Fahrenheit scholarships for the best three PhD students from abroad. The Gdańsk-born world class physicist, engineer and the creator of a temperature scale used in many countries all over the world was chosen to present the vision of Gdańsk as an open and ambitious city which invests in science.

The Fahrenheit Universities (FarU) comprise the leading Polish higher education institutions – the Medical University of Gdańsk, Gdańsk University of Technology and University of Gdańsk. For many years, those universities have been undertaking joint initiatives of the scientific, educational and organisational nature. Owing to the creation of the Union of Universities, it is possible to enhance current cooperation and create in Pomerania one of the strongest academic centres in Poland.

Fahrenheit Scholarship

The City of Gdańsk has actively supported the scientific development of young talents for many years. In 2005, upon the initiative of the then Mayor of Gdańsk, Paweł Adamowicz, the first scholarship was funded in Poland to finance studies abroad for the most outstanding Polish and International Baccalaureate graduates. Thanks to the scholarship, the most gifted upper-secondary school graduates who are permanent residents of Gdańsk can undertake studies at prestigious universities all over the world, at which they achieve the best results and become the ambassadors of their home city abroad. In 2022, the scholarship programme was extended to include a new module – scholarships for international PhD students.

WHY CHOOSE US?

An internship at the FarU creates a unique opportunity to take part in the life of the three universities, which are most highly recognised by employers in Poland. Combined with a year's experience of living in a forward-looking, economically developed city with a coastal climate, this provides an ideal opportunity to enhance your qualifications in a development conducive environment.

ABOUT US

The Fahrenheit Union of Universities (FarU) in Gdańsk was established upon the joint request of the Rectors of the Medical University of Gdańsk, Gdańsk Tech and the University of Gdańsk to build together the city's position as a strong academic centre in Poland and abroad.

GDAŃSK – CITY OF FREEDOM

The free city of Gdańsk – a city with a centuries-old and rich tradition, is the third most famous city in Poland, following only Warsaw and Krakow. It is one of the most important business centres of this part of Europe. A city that appreciates tradition, culture and modernity, and a city that cares about visitors from various cultures, will definitely make you want to come back here.
